stern
STERN ENGINEERING LTD

STERN'S SOAP & WATER LOOK

Stern offers a variety of models for its touch free soap dispensers, with various installation options. Composed of a chrome plated brass body and a peristaltic pump, the complete touch free soap dispensers range is easy to use and reliable. Most importantly, they complete Stern's touch free hand washing experience, and provide a complete germ free and automated environment.

Individual soap dispensers

Stern's individual soap dispensers are provided with a 1 liter soap bottle and support. They are available in both deck mounted and wall mounted versions for under the sink, duct concealed and concealed installations.

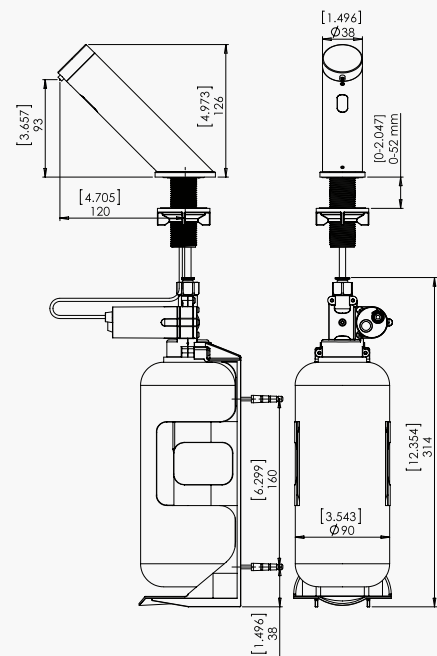

Multiple Feed systems

Stern's multiple feed dispensing systems are designed to allow connection of up to 6 soap dispensers into one 5 liters tank. Among others, variations include Top filling multifeed system and under the sink filling multifeed system.

TOP FILLING MULTIFEED KIT

FOR MULTIPLE SOAP DISPENSER INSTALLATION

Stern’s top filling multifeed soap dispenser kit is the ideal solution for heavy usage areas. Our multifeed system includes a 5 liters tank and supplies soap to up to 6 soap dispensers simultaneously. Top filling mechanism with cover and top button in high quality chrome plated finish. Can be used with Stern’s wall or deck mounted soap dispensers.

- Easy to install
- High quality PVC clear tubing
- 5 Liter soap container
- To be used with up to 6 soap dispensers
- Available in 12V transformer version only.

SOAP DISPENSER

REMOTE CONTROL

As Stern's soap dispensers are installed in different locations with different project requirements, changing the soap dispenser settings is imperative.

Stern's soap dispenser remote control allows changing the following settings:

	SOAP QUANTITY	The 1-4 drop keys allow the user to choose the desired soap quantity, while the exact soap dosage depends on the soap viscosity.
	TEMPORARY OFF FUNCTION	This function is ideal to perform any kind of activity in front of the sensor without operating the system (for example, cleaning). The soap dispenser will remain shut for one minute when this button is pressed once. To cancel this function and to return to normal operation press the On/Off button again or wait one minute.
	ADJ	This function allows coming back to soap quantity factory settings.
	REFILL THE SOAP TANK	Once the soap tank has been filled \ re-filled, press the FILL button. The pump would work for one minute in order for the soap to start coming out of the soap dispenser spout. To stop this activity press the FILL button again. If the soap has not started coming out of the spout, press the Fill button again.
